X - Appendices	16

I - Executive Summary

This Six-Year Capital Facilities Plan has been prepared by the Kent School District as the organization's capital facilities planning document, in compliance with the requirements of Washington's Growth Management Act, King County Code K.C.C. 21A.43 and Cities of Kent, Covington, Renton, Auburn, Black Diamond, Maple Valley, and SeaTac. This annual Plan update was prepared using data available in the spring of 2021 for the 2021-2022 school year. This annual update of the Plan reflects no new major capital projects, and an inflation-based adjustment to prior year impact fee rates.

This Plan is consistent with prior long-term capital facilities plans adopted by the Kent School District. This Plan is not intended to be the sole planning document for all of the District's needs. The District may prepare interim and periodic Long-Range Capital Facilities Plans consistent with Board Policies, taking into account a longer or shorter time period, other factors and trends in the use of facilities, and other needs of the District as may be required.

Prior Capital Facilities Plans of the Kent School District have been adopted by Metropolitan King County Council and Cities of Kent, Covington, Auburn and Renton and included in the Capital Facilities Plan element of the Comprehensive Plans of each jurisdiction. This Plan has also been submitted to cities of Black Diamond, Maple Valley, and SeaTac for their information and inclusion in their Comprehensive Plans.

In order for impact fees to be collected in the unincorporated areas of Kent School District, the Metropolitan King County Council must adopt this Plan and a fee- implementing ordinance for the District. For impact fees to be collected in the incorporated portions of the District, the cities of Kent, Covington, Renton and Auburn must also adopt this Plan and their own school impact fee ordinances.

This Capital Facilities Plan establishes a standard of service in order to ascertain current and future capacity. While the State Superintendent of Public Instruction establishes square footage guidelines for capacity, those guidelines do not account for local program needs in the District. The Growth Management Act, King County and City codes and ordinances authorize the District to make adjustments to the standard of service based on specific needs for students of the District.

This Plan includes the standard of service as established by Kent School District. Program capacity is based on an average capacity and updated to reflect changes to special programs served in each building. Portables in the capacity calculation use the same standard of service as the permanent facilities.

The capacity of each school in the District is calculated based on the District's standard of service and the existing inventory of permanent facilities. The District's program capacity

of permanent facilities reflects program changes and the state’s mandated reduction of class size to meet the standard of service for Kent School District. Portables provide additional transitional capacity.

Kent School District is the fifth largest (FTE basis) district in the state. Enrollment is electronically reported monthly to the Office of the Superintendent of Public Instruction (“OSPI”) on Form P-223. Although funding apportionment is based on Annual Average Full Time Equivalent (AAFTE), enrollment on October 1 is a widely recognized “snapshot in time” that is used to report the District’s enrollment for the year as reported to OSPI.

The District's standard of service, enrollment history and projections, and use of transitional facilities are reviewed in detail in various sections of this Plan. The District plans to continue to satisfy concurrency requirements through the transitional use of portables.

This Plan currently represents projects in process funded primarily by the Kent School District’s 2016 Bond, as well as the 2018 Capital Construction Levy. Additional information about these projects can be found on the district’s capital projects homepage ([link](#)). Additionally, project updates sent to our community of stakeholders can be accessed on the KSD website ([link](#)).

Based on revised student generation rates, and district enrollment projects, the district has updated the proposed student impact fee rate for the coming year. For a short overview, see Section IX (Summary of Changes to the June 2020 Capital Facilities Plan).

II - Six - Year Enrollment Projection

For capital facilities planning, enrollment growth projections are based on cohort survival and student yield from documented residential construction projected over the next six years (*See Table 2*). For this Plan, the district relied substantially on the results from Dr. Les Kendrick's study of long-range enrollment forecasts for the Kent School District in the Fall of 2020.

King County live births and the District's relational percentage average were used to determine the number of kindergartners entering the system (*See Table 1*). 6.88% of 26,011 King County live births in 2016 is projected for 1,789 students expected in Kindergarten for October 1, 2021. This is an increase of 524 live births in King County over the previous year (*See Table 2*).

Early Childhood Education students (also identified as "ECE"), "Early Childhood Special Education ("ECSE") students are forecast and reported to OSPI separately on Form P-223H for Special Education Enrollment. Capacity is reserved to serve students in the ECE programs at elementary schools.

In addition to live birth data, enrollment projections for October 1, 2021 going forward rely upon the results of the enrollment study by Dr. Kendrick, utilizing the "medium growth" methodology.

Within practical limits, the District has kept abreast of proposed developments. The District will continue to track new development activity to determine impact to schools. Information on new residential developments and the completion of these proposed developments in all jurisdictions will be considered in the District's future analysis of growth projections.

The Kent School District serves eight permitting jurisdictions: unincorporated King County, the cities of Kent, Covington, Renton, and Auburn and smaller portions of the cities of SeaTac, Black Diamond, and Maple Valley.

STUDENT GENERATION FACTOR

"Student Factor" is defined by King County code as "the number derived by a school district to describe how many students of each grade span are expected to be generated by a dwelling unit" based on district records of average actual student generated rates for developments completed within the last ten years.

Following these guidelines, the student generation rate for Kent School District is as follows:

Single Family	Elementary	.277
	Middle School	.071
	Senior High	<u>.086</u>
	Total	.435
Multi-Family	Elementary	.258
	Middle School	.058
	Senior High	<u>.100</u>
	Total	.416

The student generation factor is based on a survey of 1,399 single-family dwelling units and 1,020 multi-family dwelling units with no adjustment for occupancy rates.

In preparing the 2021-2022 to 2026-2027 Capital Facilities Plan the District contracted with Dr. Les Kendrick of Educational Data Solutions LLC, a noted expert in demographic studies for school districts, to analyze and prepare the student generation factor. EDC included both “garden” and “urban style” apartments in the calculation for multi-family residences.

Within the district’s borders there are several low-income and multi-family housing projects coming on-line in 2021. Once developed with occupancy occurring the District does recognize that the student generation for multi-family housing may impact future Capital Facilities Plan updates.

III- Current Kent School District “Standard of Service”

In order to determine the capacity of facilities in a school district, King County Code 21A.06 references a "standard of service" that each school district must establish in order to ascertain its overall capacity. The standard of service identifies the program year, the class size, the number of classrooms, students and programs of special need, and other factors determined by the district which would best serve the student population.

This Plan includes the standard of service as established by Kent School District. The District has identified schools with significant special needs programs as “impact” schools and the standard of service targets a lower-class size at those facilities. Portables included in the capacity calculation use the same standard of service as the permanent facilities.

The standard of service defined herein will continue to evolve in the future. Kent School District is continuing a long-term strategic planning process combined with review of changes to capacity and standard of service. This process will affect various aspects of the District's standard of service and future changes will be reflected in future capital facilities plans.

Current Standards of Service for Elementary Students

- Class size ratio for grades K - 3 is planned for an average of 23 students per class, not to exceed 26.
- Class size ratio for grades 4 - 6 is planned for an average of 27 students per class, not to exceed 29.

Some special programs require specialized classroom space and the program capacity of some of the buildings housing these programs is reduced. Some students, for example, leave their regular classroom for a short period of time to receive instruction in special programs and space must be allocated to serve these programs.

Students may also be provided music instruction and physical education in a separate classroom or facility.

Some identified students will also be provided educational opportunities in classrooms for special programs such as those designated as follows:

English Learners (EL)
Education for Disadvantaged Students (Title I) – Federal Program
Learning Assisted Programs (LAP) – State Program
Highly Capable Students – State Program
Reading, math or science Labs
Dual Language Programs in four elementary schools

Inclusive Education Service for Elementary and Secondary students with disabilities may be provided in a separate or self-contained classroom sometimes with a capacity of 10- 15 depending on the program.

Current District Standards of Service for Secondary Students

The standards of service outlined below reflect only those programs and educational opportunities provided to secondary students which directly affect the capacity of the school buildings per the negotiated collective bargaining agreement with KEA.

- The average class size ratio for grades 7–8 is 30 students per class and 143 students per day, with a maximum daily class load/enrollment of 150 based on five class periods per day.

- The average class size ratio for grades 9-12 is 32 students per class and 153 students per day, with a maximum daily class load/enrollment of 160 based on five class periods per day.

Like Inclusive Education Programs listed above, many other secondary programs require specialized classroom space which can reduce the program capacity of the permanent school buildings, such as technology labs, performing arts activities, a variety of career and technical education programs, and other specialized programs.

Space or Classroom Utilization

As a result of scheduling conflicts for student programs, the need for specialized rooms for certain programs, and the need for teachers to have a workspace during their planning periods, it is not possible to achieve 100% utilization of regular teaching stations at secondary schools. Based on the analysis of actual utilization of classrooms, the Kent School District has determined that the standard utilization rate is 95% for secondary schools. Program capacity at elementary schools reflects 100% utilization at the elementary level.

IV - Inventory and Capacity of Existing Schools

Currently, the District has permanent program capacity to house 28,564 students and transitional (portable) capacity to house 2,085. This capacity is based on the District's Standard of Service as set forth in Section III. Included in this Plan is an inventory of the District's schools by type, address and current capacity (*See Table 3*). The ratio between permanent capacity and portable capacity is 94.9%-5.1%.

The program capacity is periodically updated for changes in programs, additional classrooms and new schools. Program capacity has been updated in this Plan to reflect program changes implemented in the Fall of 2020.

Calculation of Elementary, Middle School and Senior High School capacities are set forth in Appendices A, B, and C. Maps of existing schools are included.

For clarification, the following is a brief description of some of the non-traditional programs for students in Kent School District:

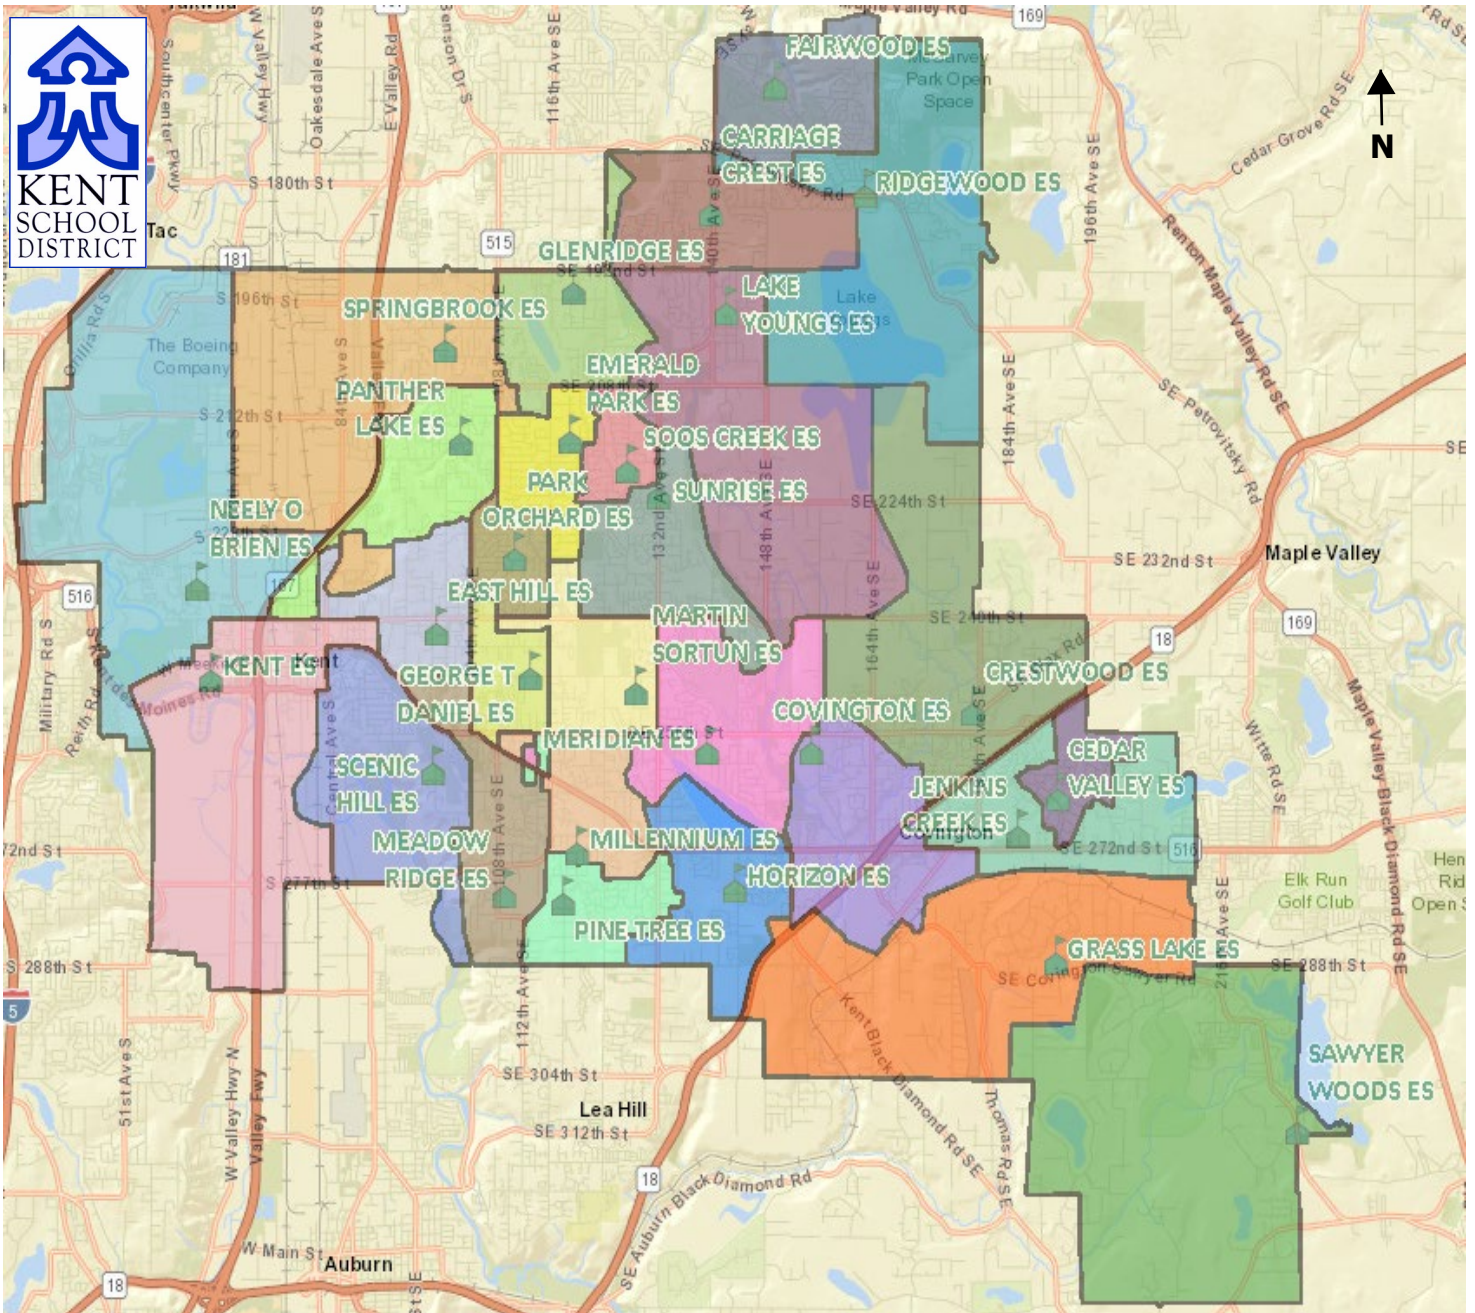

The 2021-2022 school year will have two academy programs within the district housed at our new Kent Laboratory Academy. The project was approved by the Kent Board of Directors in 2019 by utilizing funding from the 2016 Bond Project "20 Classrooms". The new facility has 24 classrooms and will now be utilized for many types of Academy related programs. The previous facility of these two programs (Kent Phoenix Academy Campus) will have the voter approved 2018 Levy Projects completed and will be available for additional capacity for our District at the secondary level.

iGrad - Kent School District has developed the Individualized Graduation and Degree Program or "iGrad". iGrad offers a second chance to students aged 16-21 who have dropped out of high school and want to earn a high school diploma. iGrad is not included in this Capital Facilities Plan because it is served in leased space at the Kent Hill Plaza Shopping Center. Over the past three years, enrollment in the iGrad program has averaged over 300 students.

V - Six-Year Planning and Construction Plan

In November [2016](#), the voters of the Kent School District approved a bond measure for \$252 million. This new bonding authority provided for the replacement for Covington Elementary school, which opened in August of 2018, a new elementary school in the Kent Valley (Currently being built at the former location of Kent Mountain View Academy – River Ridge Elementary), and the twenty additional classrooms project redirected by the Kent School Board to build a 20 classroom Kent Academy Facility housing multiple academy programs in our district, which is currently underway at the site of the Old Panther Lake Elementary School (The Laboratory Academy).

At the time of preparation of this Plan in spring 2021, the following projects to increase capacity will be a part of our student capacity in the Kent School District.

- Construction is more than 80% completed for the New Valley Elementary School (River Ridge) on West Hill within the City Limits of SeaTac, WA. The 89,000 square foot K-6 school project is being funded with bond funds and impact fees from King County. It will open for the 2021-2022 school year.
- Construction is more than 95% complete for our new Kent Laboratory Academy at the Old Panther Lake Elementary Site in Kent in order to free up space at the current Kent Phoenix Academy location (formerly Sequoia Junior High) for additional classroom space if needed and/or to open another middle school soon. The new 59,000 square foot facility will accommodate a variety of Academy Programs within the Kent School District.
- Some funding for lease or purchase of additional portables may be provided by impact fees as needed. Sites are based on need for additional capacity.

As a critical component of capital facilities planning, county and city planners and decision-makers are encouraged to consider safe walking conditions for all students when reviewing applications and design plans for new roads and developments. This should include sidewalks for pedestrian safety to and from school and bus stops as well as bus pull-outs and turn-arounds.

Included in this Plan is an inventory of potential projects and sites identified by the District which are potentially acceptable site alternatives in the future (*See Table 4 & Sitemap*).

Voter approved bond issues have included funding for the purchase of sites for some of these and future schools, and the sites acquired to date are included in this Plan. Some funding is secured for purchase of additional sites, but some may be funded with impact fees as needed. Not all undeveloped properties meet current school construction requirements, and some property may be traded or sold to meet future facility needs. The Board of Directors has started the process to sell surplus property over the last school year.

The Board will continue an annual review of standards of service and those decisions will be reflected in each update of the Capital Facilities Plan.

Notes:								
¹ TBD - To be determined - Some sites are identified but placement, timing and/or configuration of portables has not been determined.								
² Numbers correspond to sites on Site Bank Map on Page 19. Other Map site locations are parcels identified in Table 7 on Page 29.								

I - Portable Classrooms

The Plan references use of portables as interim or transitional capacity and facilities.

Currently, the District utilizes portables to house students in excess of permanent capacity and for program purposes at some school locations (*Please see Appendices A, B, C*).

Based on enrollment projections, implementation of full day kindergarten programs, lower state mandated class sizes, program capacity, and the need for additional permanent capacity, the District anticipates the need to purchase or lease additional portables during the next six-year period to ensure capacity (Noted in section V. Six Yr. Planning Construction).

During the time period covered by this Plan, the District does not anticipate that all of the District's portables will be replaced by permanent facilities. During the useful life of some of the portables, the school-age population may decline in some communities and increase in others, and these portables provide the flexibility to accommodate the immediate needs of the community.

Portables may be used as interim or transitional facilities:

1. To prevent overbuilding or overcrowding of permanent school facilities.
2. To cover the gap between the times of demand for increased capacity and completion of permanent school facilities to meet that demand.
3. To meet unique program requirements.

Portables currently in the District's inventory are continually evaluated resulting in some being improved and some replaced.

The Plan projects that the District will use portables to accommodate interim housing needs for the next six years and beyond. The use of portables, their impacts on permanent facilities, life cycle and operational costs, and the interrelationship between portables, emerging technologies, and educational restructuring will continue to be examined.

VII - Projected Six-Year Classroom Capacity

As stated in Section IV, the program capacity study is periodically updated for changes in special programs and reflects class size requirements, class size fluctuations etc. As shown in the Inventory and Capacity chart in Table 3, the program capacity is also reflected in the capacity and enrollment comparison charts (*See Tables 5 & 5 a-b-c*).

Enrollment is electronically reported to OSPI on Form P-223 on a monthly basis and funding apportionment is based on Annual Average FTE (AAFTE). The first school day of October is widely recognized as the enrollment “snapshot in time” to report enrollment for the year.

Kent School District continues to be the fifth largest district (both FTE and headcount basis) in the state of Washington. The P-223 Headcount for October 2020 was 24,587 with kindergarten students counted at 1.0 and excluding ECSE and college-only Running Start students.

In October 2020, there were an additional 1,102 students in 11th and 12th grade participating in the Running Start program at different colleges and receiving credits toward both high school and college graduation. Of these students, 686 attended classes only at the college (“college-only”) and are excluded from FTE and headcount for capacity and enrollment comparisons. Kent School District has one of the highest Running Start program participation rates in the state.

Based on the enrollment forecasts, permanent facility inventory and capacity, current standard of service, portable capacity, and future additional classroom space, the District plans to continue to satisfy concurrency requirements through the transitional use of portables (*See Table 5 and Tables 5 a-b-c*).

This does not mean that some schools will not experience overcrowding. There may be a need for additional portables and/or new schools to accommodate growth and additional programs within the District. New schools may be designed to accommodate placement of future portables. School attendance area changes, limited and costly movement of portables, zoning changes, market conditions, and educational restructuring will all play a major role in addressing overcrowding and underutilization as well as possible overcrowding of facilities in different parts of the District.

VIII - Finance Plan

The finance plan shown on *Table 6* demonstrates how the Kent School District plans to finance improvements for the years 2021-2022 through 2026-2027. The financing components include secured and unsecured funding and impact fees. The plan is based on future bond issues, state school construction assistance, collection of impact fees under the State Growth Management Act and voluntary mitigation fees paid pursuant to State Environmental Policy Act.

With River Ridge Elementary School (New Valley School Project) and Kent Laboratory Academy (New Academy Project) coming on-line for school year 2021-2022, this will help support the capacity issue that has been an issue for our district. The building rate within the City of Kent and surrounding areas within our boundary continue to be robust. The district is likely to see growth in enrollment due to these conditions.

In November 2016, the District held a special election to approve the authorization of \$252,000,000 in bonding authority. The projects described above are part of this authorization. The first series of bonds (\$80 million) were issued in February 2017, which funded the Covington Elementary Replacement School, as well as other infrastructure projects. Impact fees will be used at both the New Valley and Academy projects due to escalation in construction pricing across the Pacific Northwest.

According to RCW 82.02.090, the definition of an impact fee is ". . . a payment of money imposed upon development as a condition of development approval to pay for public facilities needed to serve new growth and development, and that is reasonably related to the new development that creates additional demand and need for public facilities, that is a proportionate share of the cost of the public facilities, and that is used for facilities that reasonably benefit the new development. 'Impact fee' does not include a reasonable permit or application fee." Mitigation or impact fees can be calculated on the basis of "unhoused student need" or "the maintenance of a district's level of service" as related to new residential development.

A mitigation/impact fee may be imposed based upon a determination of insufficient existing permanent and/or portable school space or to pay for permanent and/or portable school space previously constructed as a result of growth in the district. A district's School Board must first approve the application of the mitigation or impact fees and, in turn, approval must then be granted by the other general government jurisdictions having responsibility within the district, counties, cities and towns. (Kent, Covington, Renton, Auburn, Black Diamond, Maple Valley, and SeaTac)

Though the current enrollment projections increase for both elementary and secondary schools are relatively flat, the ongoing need to provide permanent instructional facilities to house students is a driving need as the shifts in our family populations continue, due to ongoing development. Impact fees will be used to support and address the challenges related to the number of temporary instructional facilities currently in use, the replacement of some of these aged facilities, the maintenance of the district's level of services, and the potential expansions to existing facilities in future years.

The Kent School District 2021 CFP update includes continued execution of the 2016 Capital Bond Projects and anticipation of the data collection and review of our Facility Assessment Reports within the coming months. With the opening of our River Ridge Elementary School and the Kent Laboratory Academy, we are advancing opportunity to add capacity for our programs and student-based needs. The District Facilities and Capital Planning Teams have been preparing to complete an initial plan (Fall 2021) as we move the next steps of creating a Capital Bond Planning Task Force (CBPTF) – which will include District personnel, design professionals, teaching staff, student voice as well as community members to being well collaborated discussions to this platform. Our initial plan has revealed priorities including school replacement due to age, and the need for added permanent facilities to (1) reduce and eliminate our need for portables and (2) accommodate future growth as housing in the Kent region continues to expand. Once the CBPTF has it will be brought before the District’s Board of Directors for comments, discussion, and approval. A Capital Bond Measure would follow soon after approval. Portable purchases may be required before the Bond Measure passes as it takes approximately three years from design to open for most large-scale projects such as schools or added permanent capacity. Future updates to this Capital Facilities Plan will include detail of any adopted planning.

For the Six-Year Finance Plan, costs of future schools are based on estimates from Kent School District Capital Planning Team. Please see pages 13-14 for a summary of the cost basis.

Cost Basis Summary

For impact fee calculations, construction costs are based on cost of the last elementary school, adjusted for inflation, and projected cost of the future elementary schools and additional classrooms.

Project	Projected Cost
New Elementary School Kent Valley (To open Fall 2021) - Board Approved Name – River Ridge Elementary	\$55,000,000
New Academy Facility (To open Fall 2021) - Board Approved Name – Kent Laboratory Academy	\$36,000,000

Site Acquisition Cost

The site acquisition cost is based on an average cost of sites purchased or built on within the last ten years. Please see Table 7 for a list of site acquisition costs and averages.

District Adjustment

The impact fee calculations on Appendix B & C include a “District Adjustment” which is equal to the amount of increase that the impact fee formulas total for this year and adjusted for the decrease in the 2022 CY Consumer Price Index (2.2%) for the Seattle metropolitan area (Previously 2.5% for the 2021 CY).

FC = Facility Credit (if applicable)		0
District Adjustment		(\$5,154)
Net Fee Obligation per Residential Unit - Multi-family		\$2,457.53

IX - Summary of Changes to June 2020 Capital Facilities Plan

The Capital Facilities Plan (the "Plan") is updated annually based on previous Plans in effect since 1993. The primary changes from the June 2020 Plan are summarized here.

Changes to capacity continue to reflect fluctuations in class size ratio as well as program changes. Changes in portables or transitional capacity reflect use, lease or purchase, sale, surplus and/or movement between facilities.

The district worked with contractor Educational Data Solutions, LLC out of Seattle Washington to update student generation factors. The updated rates are included in the body of the Plan.

The student headcount enrollment forecast is updated annually. All Elementary schools now have Full Day Kindergarten so six-year Kindergarten projections were previously modified to meet the requirements for Full Day Kindergarten programs at all elementary schools.

The district expects to receive some State Funding Assistance (formerly called "state matching funds") for projects in this Plan and tax credit factors are updated annually. Unfunded site and facility needs will be reviewed in the future.

The impact fees for 2022 calendar year will change based on the percentage increase of the consumer price index for the Seattle metropolitan area. The increase for 2022 calendar year is 2.2% (Based on the OSPI Applied to LEA & Levy per pupil inflators CPI as of March 2021). For single-family residences, the fee will increase by \$125.24 to \$5818.06. The impact fee for multi-family units will increase by \$52.90 to \$2,457.53.

X - Appendices

Changes to Impact Fee Calculation Factors Include:

ITEM	Grade/ Type	FROM	TO	Increase/ Decrease	Comments
Student Generation Factor	Elem	0.334	0.277		
Single Family (SF)	MS	0.078	0.071		
	SH	0.117	0.086
