Date

I hereby certify under the penalty of perjury of the laws of the State of Washington, that I have read and examined this application and know that the information contained herein is true and correct. I will comply with all provisions of the law and ordinances governing this type of construction work, whether specified herein or not. I understand that granting a permit does not authorize me in any way to violate or cancel any of the provisions of Federal, State or local law regulating the construction or performance of construction sought under this permit.

INSPECTION Date: _____

Corrections: _____

For official use only:

Installation Approved YES NO

Signature of Staff: _____ Date: _____

Once the backflow assembly has been installed, call 360-886-5717 for a Public Works inspection. Once Public Works signs off your installation, you need to have it inspected and tested by a certified backflow inspector. You have 15 days to complete this inspection and return test results. If this matter goes unattended, the City will start notifications and process to shut off water service to the property.

Please provide a copy to the City of Black Diamond (reference the permit number) for final sign-off of your permit.

For a list of certified testers, please visit our website at www.ci.blackdiamond.wa.us – click on the Public Works tab, then scroll down and select Water. [Certified Back Flow Testers](#)

For a list of approved backflow assemblies approved for use by the Department of Health go to: [Approved Backflow Assemblies](#) or visit link at <http://fccchr.usc.edu/list.html>

Whereas the City may need to protect your home and the City's water system from cross-connection contamination from the irrigation system being installed, the City will need the authority and right to enter the property, shut off, and lock the valve to the irrigation system without shutting off the potable water to your house. **By signing this permit, you are giving the City access rights to your property for the purpose of isolating the irrigation system from the residential water service and the City's public water system.** The City will unlock the valve to the irrigation system once the check valve is serviced and tests show proper function.

I hereby certify under the penalty of perjury of the laws of the State of Washington, that I have read and examined this application and know that the information contained herein is true and correct. I will comply with all provisions of the law and ordinances governing this type of construction work, whether specified herein or not. I understand that granting a permit does not authorize me in any way to violate or cancel any of the provisions of Federal, State or local law regulating the construction or performance of construction sought under this permit.
